## Practice Project: Part 1 - GitHub UI

Estimated Time: 30 minutes

#### Overview

In this lab you will start your journey with the GitHub implemention for your organisation by creating a repository in your GitHub account and then initialising the repository with a README.md file and a License. Following this, you'll update the README file to include a Code of Conduct and Contribution Guidelines markdown files. After making these changes, you'll commit the files to your repository.

Next, you'll create a new branch and add code for Shipping logistics calculation. To wrap up, you'll merge this branch into the main branch using a Pull Request.

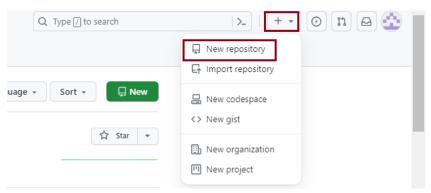

#### **Objectives**

After completing this lab, you will have demonstrated that you can:

- 1. Create a repository with a README.md file and a license.
- 2. Update the existing files.
- 3. Commit the files to your repository.
- 4. Create a new branch and add files to it.
- 5. Merge this branch to the main branch using a Pull Request.

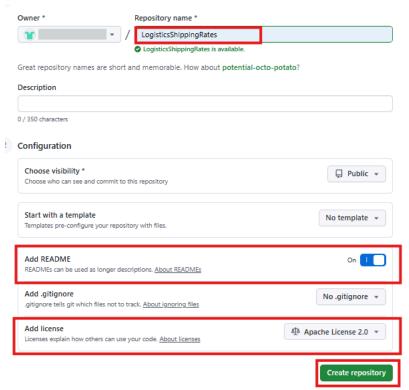

#### Task 1: Create a repository with a README file and a license.

1. At the top right of the GitHub home page, click on the + icon and select New repository.

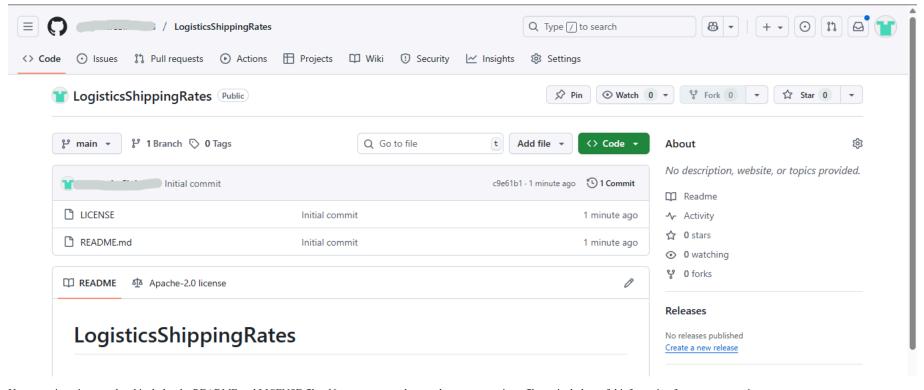

- 2. Create a new GitHub repository called LogisticsShippingRates and make sure that it is **Public**.
- 3. Select the Add a README file field. Click on the Choose a license field and select Apache License 2.0 from the drop down. Finally, click on Create repository.

about:blank 1/21

4. After successfully creating a new repo, you will see the following screenshot.

about:blank 2/21

Your repository is created and includes the README and LICENSE files. Now, you are ready to update your repository files to include useful information for your community.

#### Task 2: Update the README file.

1. Click on README.md file to open it and click the pencil icon to edit it.

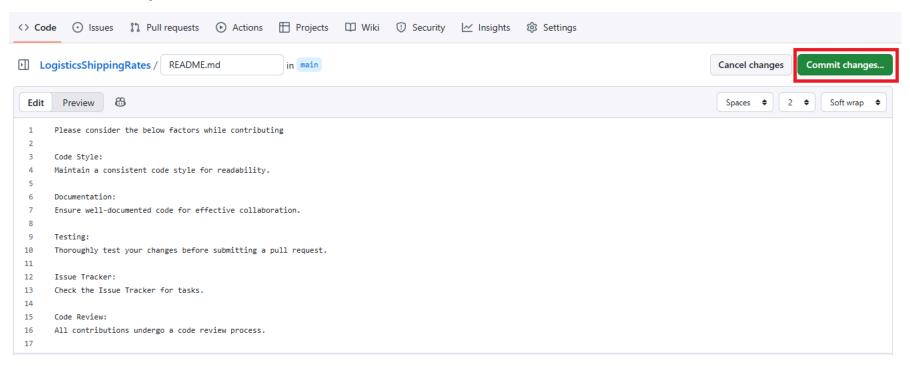

# LogisticsShippingRates *∂*

2. Add the following information to the file:

about:blank 3/21

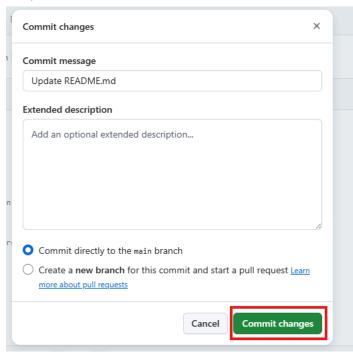

```
Please consider the below factors while contributing Code Style:
Maintain a consistent code style for readability.
Documentation:
Ensure well-documented code for effective collaboration.
Testing:
Thoroughly test your changes before submitting a pull request.
Issue Tracker:
Check the Issue Tracker for tasks.
Code Review:
All contributions undergo a code review process.
Licensing:
Contributions are licensed.
```

3. Now click on Commit changes

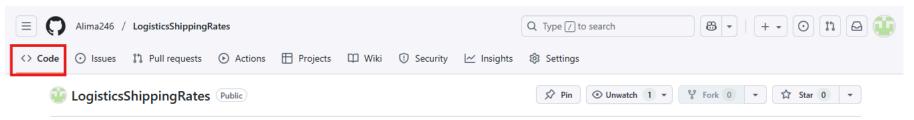

4. Ensure that the radio button to commit directly to the main branch is selected. Add a commit message and click on Commit Changes

about:blank 4/21

NOTE: After completing the steps in each of the tasks, if you are unable to see the options depicted in the provided screenshots, click on the Code option as highlighted in below screenshot:

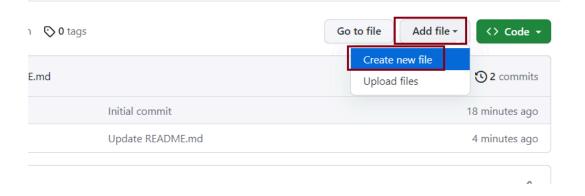

#### Task 3: Add a code of conduct.

A code of conduct helps set ground rules for the behavior of your project's participants. It defines standards for how to engage in a community.

GitHub provides templates for common codes of conduct to help you quickly add one to your project.

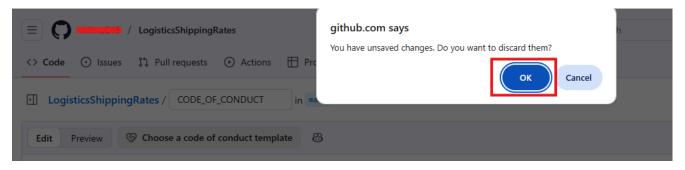

1. To create a new file click on **Add file** and then Create New File.

2. Add a new file named CODE\_OF\_CONDUCT.md to the root folder of the repository. The Choose a code of conduct template button is displayed.

3. Click the Choose a code of conduct template button. You will see a popup mentioning you may lose unsaved changes. Click on OK.

4. Click on Contributor Covenant to load this template. Then click Review and submit to add the file to your project.

about:blank 6/21

Add a code of conduct to your project

# Contributor Covenant Recommended for projects of all sizes

# **Citizen Code Of Conduct**Suitable for large communities and events

### **Contributor Covenant Code of Conduct**

#### Our Pledge

We as members, contributors, and leaders pledge to make participation in our community a harassment-free experience for everyone, regardless of age, body size, visible or invisible disability, ethnicity, sex characteristics, gender identity and expression, level of experience, education, socio-economic status, nationality, personal appearance, race, religion, or sexual identity and orientation.

We pledge to act and interact in ways that contribute to an open, welcoming, diverse, inclusive, and healthy community.

#### **Our Standards**

Examples of behavior that contributes to a positive environment for our community include:

- · Demonstrating empathy and kindness toward other people
- · Being respectful of differing opinions, viewpoints, and experiences
- · Giving and gracefully accepting constructive feedback

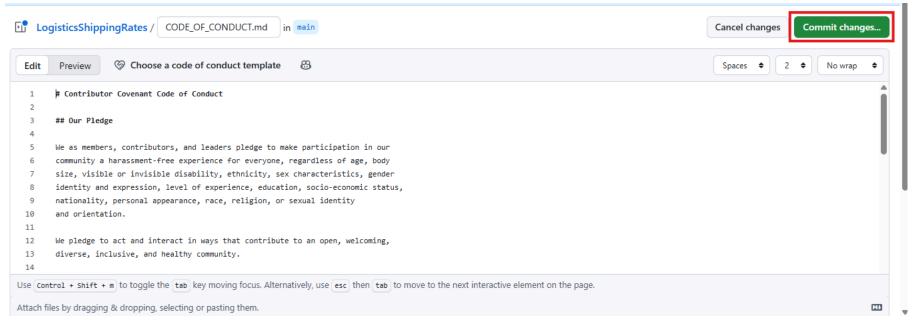

5. Scroll down the page to read the content. Click on Commit changes.

To adopt Contributor Covenant, enter your details. You'll have a chance to review before committing a CODE\_OF\_CONDUCT.md file to a new branch or the root of your project.

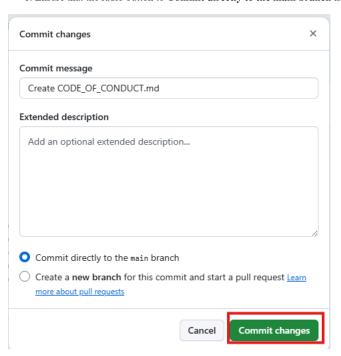

Contact method

Review and submit

about:blank 7/21

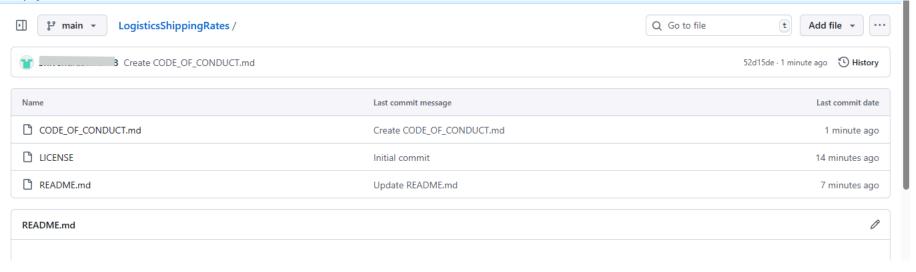

6. Ensure that the radio button to Commit directly to the main branch is selected and click Commit changes.

If the page is zoomed in, you may see only the Commit changes button and not the radio button. Zoom out or scroll down to see the radio button.

about:blank 8/21

7. Your project now contains a code of conduct.

#### Task 4: Establish contribution guidelines.

Contribution guidelines provide clear instructions for individuals looking to contribute to the project. To implement these guidelines, please follow these steps:

- 1. Create a new file in the repository's root directory and name it CONTRIBUTING.md.
- 2. Inside the file, include the following information:

Contribution guidelines

Welcome Contributors!

Thank you for considering contributing to the centralized repository. This document outlines the guidelines for contributing to the development of Shipping Rates and Calculations. Code style

Please follow the coding style and conventions used in the existing codebase. This helps maintain consistency across the project.

Documentation

Ensure that your contributions are well-documented. Include comments in your code where necessary and provide a clear and concise description of your changes in the pull request. Testing

Before submitting a pull request, make sure your changes have been tested thoroughly. Include relevant test cases and ensure that existing tests pass.

Issue tracker Check the iss

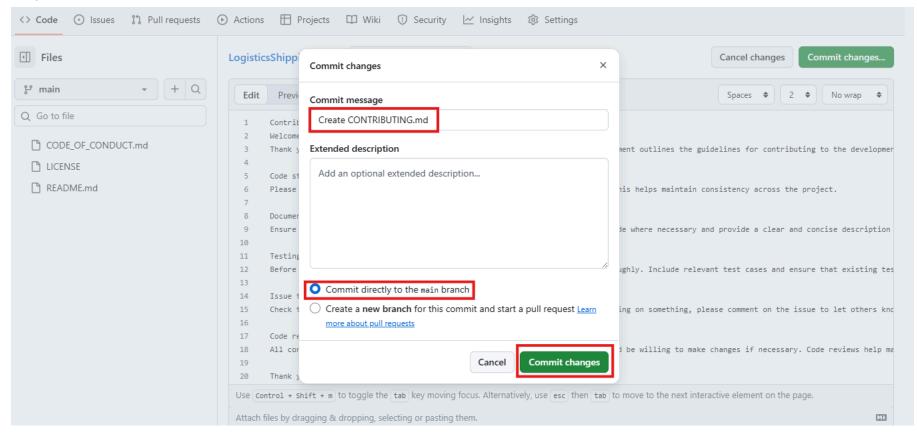

Check the issue tracker for any open issues or feature requests. If you're working on something, please comment on the issue to let others know.

Code review

All contributions will go through a code review process. Be open to feedback and be willing to make changes if necessary. Code reviews help maintain code quality and consistency. Thank you for your contribution!

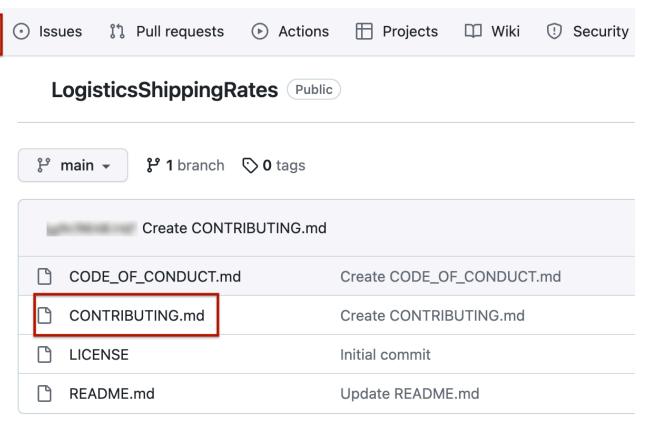

3. Commit this file to your repository.

about:blank 9/21

4. Click on Code to go to the repository home page.

about:blank 10/21

Your project now contains Contribution Guidelines as well.

Task 5: Create a new branch.

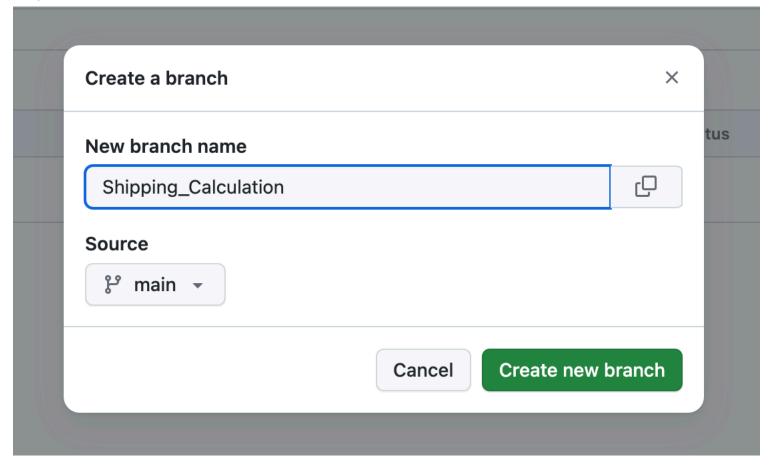

<> Code

1. Click on branch in your repository.

2. Now, click on New Branch and enter the branch name as Shipping\_Calculation, then click Create New Branch

about:blank 11/21

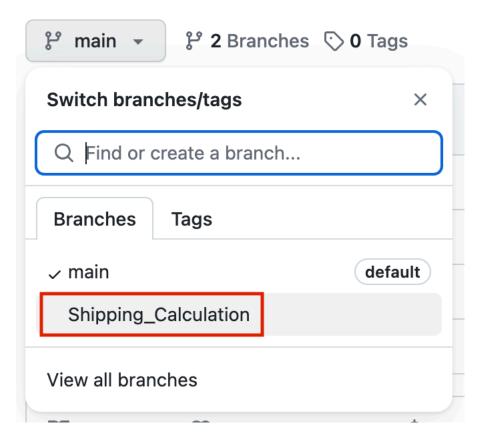

This will be used for adding your Shipping Calculation code.

#### Task 6: Add the Shipping Calculation code in this branch.

 $1.\ Change\ to\ the\ Shipping\_Calculation\ branch\ by\ selecting\ it\ from\ the\ dropdown.$ 

about:blank 12/21

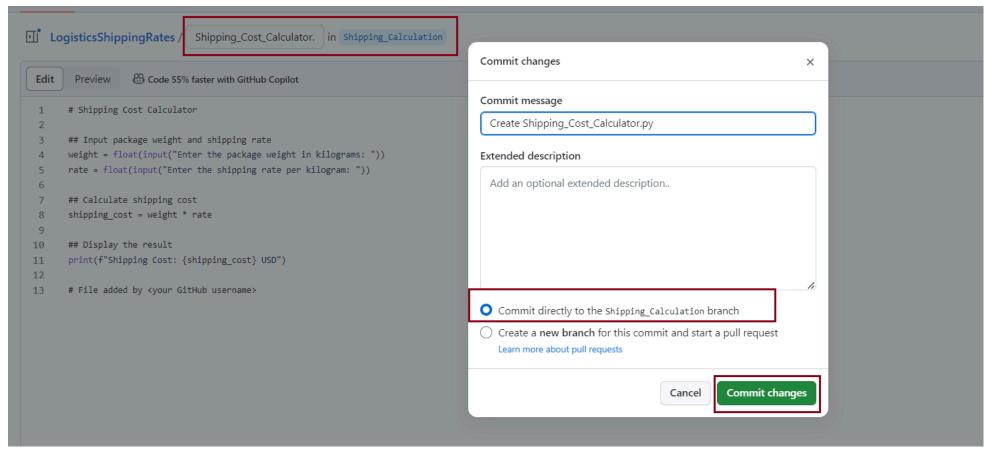

- 2. Create a new file named Shipping\_Cost\_Calculator.py.
- 3. Add the following code in the new file:

```
# Shipping Cost Calculator
## Input package weight and shipping rate
weight = float(input("Enter the package weight in kilograms: "))
rate = float(input("Enter the shipping rate per kilogram: "))
## Calculate shipping cost
shipping_cost = weight * rate
## Display the result
print(f"Shipping Cost: {shipping_cost} USD")
```

4. Ensure that the radio button to Commit directly to the Shipping\_Calculation branch is selected and click Commit changes.

about:blank 13/21

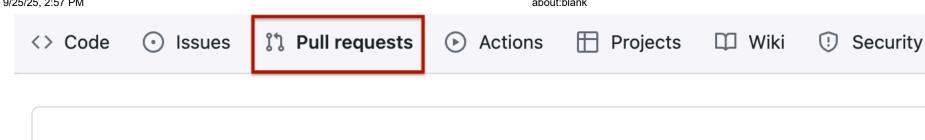

The Shipping\_Calculation branch now contains the Shipping\_Cost\_Calculator.py file.

#### Task 7: Create a pull request to the main branch.

1. Go to the Pull request tab and click on Compare & pull request.

about:blank 14/21

# Label issues and pull requests for new contributors

Now, GitHub will help potential first-time contributors discover issues labeled with good first issue

Shipping\_Calculation had recent pushes 1 minute ago

Compare

2. Add an appropriate commit message and click on Create pull request.

15/21 about:blank

# Open a pull request

Create a new pull request by comparing changes across two branches. If you need to, you can also compare ac

### Add a title

Merge Shipping\_Cost\_Calculator.py to the main branch

# Add a description

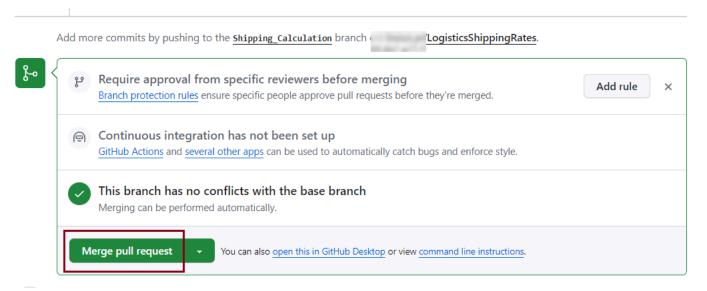

about:blank 16/21

#### Task 8: Merge the branch to the main branch.

1. Click on Merge pull request.

- 2. Click on Confirm merge.
- 3. The successfully merged changes will be shown in the Github UI as below:

about:blank 17/21

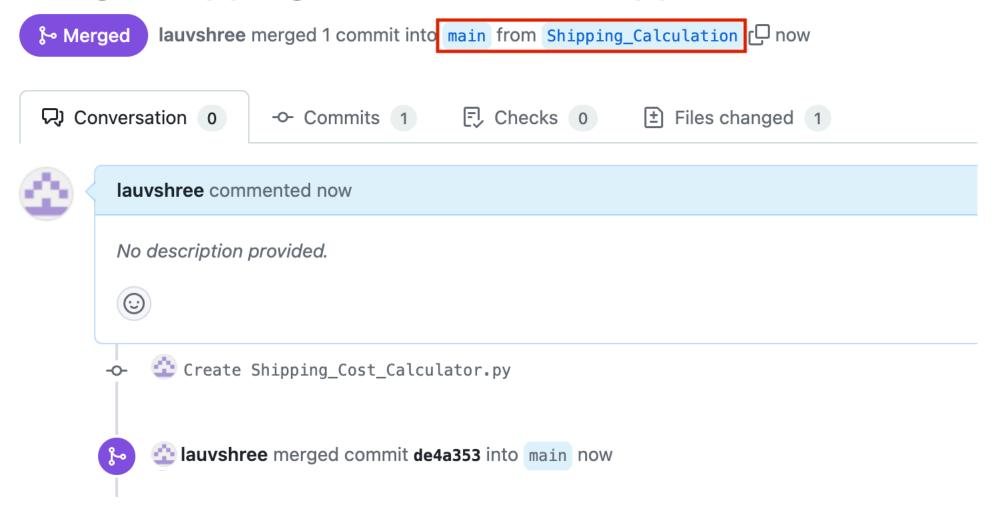

4. You will see the below message once the branch is merged.

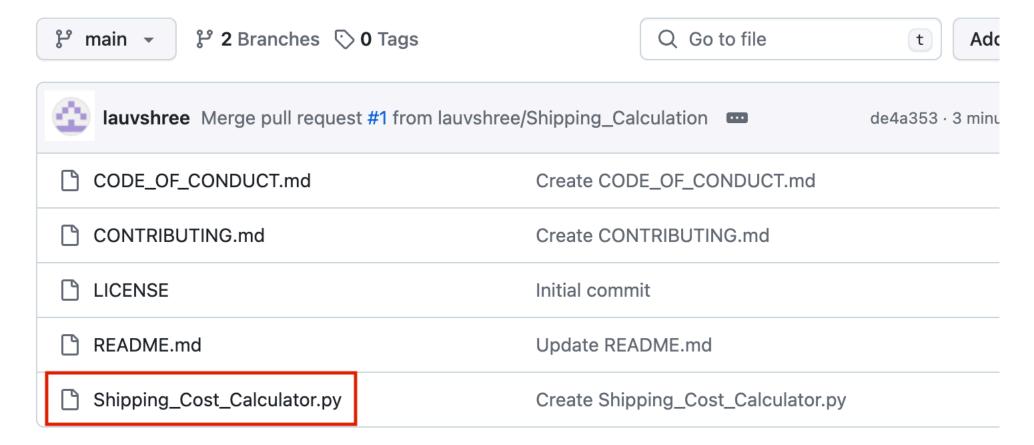

about:blank 18/21

# Merge Shipping\_Cost\_Calculator.py to the main bran

5. Check to see that your project now contains the Shipping\_Cost\_Calculator.py file as well.

about:blank 19/21

#### Congratulations

In this lab you have created a repository in your GitHub account with a README.md file and a License. You have then edited the README file and added Code of Conduct, and Contribution Guidelines. Further, you have committed these files to your repository. Finally, you have added the Shipping logistics calculator file to a new branch, and merged it to the main branch using a Pull Request.
